

# Before Starting Reasoner

# After Starting Reasoner

The screenshot displays a Semantic Web editor interface with the following components:

- Class hierarchy:** A tree view showing the hierarchy of classes. The 'vCard Name Class' is highlighted, and its subclasses, 'MarriedWoman' and 'UnmarriedWoman', are also visible.
- Direct instances: Helen:** A list of instances for the 'vCard Name Class'. The instance 'Helen' is highlighted.
- Description: Helen:** A section showing the description of the instance 'Helen'. It lists the types 'vCard Name Class', 'MarriedWoman', and 'vCard Class'.
- Property assertions: Helen:** A section showing the property assertions for the instance 'Helen'. It lists various properties and their values, including 'given name', 'formatted name', 'family name', 'maidenName', and 'owl:topDataProperty'.

The interface also includes a search bar at the top right and a status bar at the bottom indicating 'Reasoner active' and 'Show Inferences'.
